

Complete Thymic Formula™ Product Specifications

Dr. Burgstiner's Original Complete Thymic Formula™ offers the body a comprehensive and wholesome foundation of food based nutritional support while making available factors that are known to strengthen and balance immune function. Formulated by nutritional pioneer **Carson Burgstiner, MD** and anchoring the **Burgstiner Wellness Protocol**, this ultimate wellness formula combines holistic nutrient support with glandular therapy for the thymus, the master gland of immunity.

Supporting the thymus gland nourishes and strengthens the body's natural defense system by influencing the number and specific function of T-cells. Hormones secreted by the thymus gland play a central role in immune regulation. They are responsible for imparting the memory component to immune cells, enabling them to recognize and destroy viruses and harmful microbes. Lower thymic hormone levels in the blood are associated with depressed immunity and are typical of the elderly, individuals with chronic infections, auto-immune disorders, cancer and AIDS patients. People who have undergone radiation, chemotherapy or other immune suppressing treatments also typically have low thymus function.

There are many ways to support immune function, but none as foundational as glandular therapy for the thymus. Not only does it provide gland-specific nutrients, but it appears to make available vital information encoded in the RNA and DNA of the glandular materials that simply cannot be transmitted in any other way. Add to that in one delivery system the whole food based vitamins, minerals, antioxidants and other nutrients that serve to activate cellular metabolism and you have a supplement with the potential to profoundly impact the quality of human life!

Like all Logos products, **Complete Thymic Formula** is manufactured under pharmaceutical conditions with premium grade nutrients, and uses advanced assimilation technology to assure maximum absorption.
